-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### *Claim Rejections - 35 USC § 103*

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-24 are rejected under 35 U.S.C. 103(a) as being unpatentable over JP'631 or JP'840.

The applied JP'631 and JP'840 disclose that it is known to use cyclohexanone in mixed solvent composition for a coating material. The amount of the cyclohexanone may be within the claimed amounts. The applied references do not specifically teach that such coating composition can be deposited directly over the surface to the transparent film. However, it would have been obvious to one having ordinary skill in the art at the time of the invention to deposit coating composition of the prior art directly over the transparent film or any other substrate film, since such would optimize optical properties of the multilayered structure. Also, it would have been obvious to substitute different materials for substrate layer or a coating layer to improve refractive indexes of the individual layers and a multiple layer laminate.

The amendments and remarks filled by applicants have been fully considered. The claims however, remain unpatentable in view of the new grounds of rejections.
